Her Foundation Website

Change Document: Feedback Corrections and Event Updates

WEDE5020 Portfolio of Evidence | Phiwokuhle Thobile Zikalala | ST10506739 | 2 November 2026

1. Purpose

This document records every change made to the Her Foundation project after the lecturer feedback on Part 1 and Part 2, so that the lecturer can see what was corrected and where. The same changes are listed in the Changelog section of README.md in the project.

Instruction followed: the existing design was not changed. After the feedback corrections css/style.css was byte-for-byte identical to before (checksum afd33abeabfa458b9960206c69dce238). The later event update (section 6) only appended new rules to the end of the file: 75 lines added and none removed, using the existing colour and font tokens.

2. Lecturer feedback and how each point was addressed

Part and mark	Feedback	What was done
Part 1, 93/100	The README file is empty and gives no project information, setup instructions, screenshots or documentation.	README.md now contains: student information, project overview, goals and KPIs, key features, sitemap with a visual diagram, file and folder structure, setup and how-to-run steps, timeline, details for Parts 1 to 3, screenshot evidence (all six pages at three sizes), deployment steps, Git workflow, feedback table, changelog, AI disclosure and Harvard references.
Part 1, 93/100	The code is not commented.	Comments were added to all six HTML pages before the navigation, main content, page banner, forms, side panel, accordion items and every script tag. HTML comments rose from 56 to 91 in total. CSS (34 section comments) and the five JavaScript files were already commented and were confirmed.
Part 2, 55/100	The GitHub has no detailed commits and README file.	The project has a Git history of separate commits, each with a descriptive message (feat, style, docs and so on), listed in the README. The README was completed as above.
Part 2, 55/100	The stylesheet is not connected properly to the web pages.	Every page links css/style.css with a relative path inside the head. All six pages were loaded in Chrome from the file system and from inside a sub-folder: the stylesheet returned status 200 and was applied each time, with no script errors. The README explains that index.html must sit at the repository root so the css, js and images paths work on GitHub Pages.

3. Changes by file

File or area	Change
index.html, about.html, services.html, gallery.html, enquiry.html, contact.html	Added explanatory comments (see section 2). Logo width and height attributes updated to 600 x 600 to match the new logo file. No change to structure, content or classes.

File or area	Change
README.md	Student number added. Visual sitemap added. Part 1 details expanded. Git workflow and commit table added. Feedback table and changelog updated. Screenshot table extended to all six pages with device names. File tree updated.
images/sitemap-diagram.png (new)	Visual sitemap showing the page hierarchy, the shared stylesheet and script, and the page-specific scripts. Required by Part 1 (a visual representation of the site structure).
images/logo.png, images/favicon.png	Replaced with the new black and gold HER. logo. The favicon is rebuilt from the crown and lettering so it stays readable at 128 pixels.
screenshots/ (18 files)	Retaken for all six pages at desktop (1280 px), tablet (820 px) and mobile (390 px), first for the new logo and again after the event update.
css/style.css	Feedback corrections: no change. Event update: new rules appended at the end for the alert bar, event card, poster grid, video block and gallery layout. Nothing existing was altered.
js/main.js	Event update: added a function that closes the alert bar and remembers it for the visit. Other scripts and data/ are unchanged.
gallery.html, index.html	Event update: see section 6.
images/ and videos/	Event update: 11 conference images in three sizes each, one video and its poster image. The six generated stand-in gallery graphics were removed.
Git repository	Separate commits with descriptive messages for the HTML comments, the logo and sitemap images, each part of the event update, the screenshots and the README.

4. Part 1 requirements check

Part 1 requirement	Status
Minimum of five pages: index, about, services, enquiry, contact	Met. A sixth page (gallery.html) is documented in the README.
Folders css, js and images; clear lowercase file names	Met.
Semantic header, nav, main and footer; headings, paragraphs, images, links	Met. One h1 per page.
Working navigation across all pages	Met. Links checked and none are broken.
Comments and readable indentation	Met after this update.
Visual sitemap	Met. images/sitemap-diagram.png, shown in the README.
README items: title, student information, overview, goals, features, timeline, Part 1 details, sitemap, changelog, references	Met.
Detailed commit messages and push to GitHub	Commits done. The push is still to be done once the repository exists.
Two project proposals, content research ZIP and wireframes	Separate submissions outside this project folder. Please confirm they are submitted.

5. Checks carried out

- Loaded index, about, services, gallery, enquiry and contact in Chrome from the file system and from a sub-folder: stylesheet status 200, styles applied, no JavaScript errors.
- Compared the checksum of css/style.css before and after the update: identical.
- Checked JavaScript syntax for all five scripts and confirmed no broken internal links.
- Submitted the enquiry form with test data: the sponsorship estimate appeared (R16,500 for 3 young women on both pathways).

6. Update: Youth Conference content and Sip & Paint alert (2 November 2026)

Request: add the pictures and video from the previous event, add an upcoming event alert for the Sip & Paint (date and location still to be confirmed), and do the home page.

Page or file	What was added
gallery.html	Seven real photographs from the Youth Conference 2026 (16 October 2026, Wits University Education Campus, venue B240) in a photo grid. Each opens in the existing lightbox and has descriptive alt text. They replace the six generated stand-in graphics.
gallery.html (video)	A 31-second clip of team members in pink HER. hoodies beside the conference banner. It uses a native video player with controls, no autoplay, a poster image and a written description. The file is 3.7 MB and loads its metadata only until played.
gallery.html (line-up)	The conference invitation poster, the two keynote speaker posters (Dr Z Thabe and Dr Dale Langsford) and the panellists poster, shown as portrait tiles that open in the lightbox.
index.html (Home)	A Sip & Paint card with the date and location shown as "To be confirmed" and an "Ask to be updated" button that links to the Contact page. A new "Our last event" section with three conference photos and a link to the Gallery.
All six pages	A gold upcoming-event alert bar at the top: "Coming soon: Her Foundation Sip & Paint. Date and location to be confirmed." with a Find out more link and a close button. Once closed it stays hidden for the rest of the visit.
images/ and videos/	Images named by content (conference-*, youth-conference-*) in 400, 800 and 1200 px versions for srcset. Video and poster are in videos/.
README.md	Key features, file tree, to-do table, changelog entry, commit table and references updated. The reference note now says the photos, video and posters are the foundation's own material.

Checks for this update: all pages loaded in Chrome at desktop, tablet and mobile sizes with no JavaScript errors and no missing files; every image loaded after scrolling; the lightbox opened from the Gallery; the video loaded (31.5 seconds); the alert closed and stayed closed on the next page; the video description was checked against frames from the clip. Two layout problems found during checking were fixed: a gap beside the first Gallery photo and the alert text wrapping onto two lines.
